PETITION FOR A BAN IN MONROE COUNTY ON NATURAL GAS AND PETROLEUM EXPLORATION AND EXTRACTION AND ALL RELATED ACTIVITIES

The magnitude of the State's upcoming decision to permit and regulate high-volume, slick-water, horizontal hydraulic fracturing (fracking) demands immediate attention and action by our County Legislature to ensure self-determination and the health and safety of our community.

Therefore, we, the undersigned residents of Monroe County, call upon the County to prohibit natural gas and petroleum exploration and extraction and all its ancillary activities within the County's jurisdiction in order to:

- **Prevent impacts of this complex, heavy industrial activity on our quality of life; and**
- **Protect our health by safeguarding clean water, air and land for generations to come.**
